

Oracle Procurement is a powerful suite of applications that offers significant business benefits, especially if it is configured to perform to its full potential. This is often not the case, and many users are not getting full value from their Oracle investment.

Our health check will identify where your system performance can be improved, and how to achieve this.

KEY BENEFITS

- IDENTIFICATION OF 'SUB-OPTIMAL' ASPECTS OF YOUR SYSTEM
- IDENTIFICATION OF AREAS OF ORACLE PROCUREMENT THAT YOU DO NOT UNDERSTAND
- ADVICE ON EXTENDING THE USE OF FUNCTIONALITY AND APPLICATIONS
- IDENTIFICATION OF QUICK WINS FROM MINOR ENHANCEMENTS TO SET-UP AND PROCESSES
- IMPACT ASSESSMENT OF UPGRADING OR EXPANDING YOUR ORACLE PROCURMENT FOOTPRINT

OTHER BENEFITS

- ADVICE ON IMPROVEMENTS TO ENHANCE PROCUREMENT CONTROL AND REPORTING
- IDENTIFICATION OF TRAINING NEEDS

Is your Oracle Procurement suite working hard enough for you?

- Are you confident in your current SCM and P2P processes?
- Are your business processes aligned with the software?
- Are you using all the functionality available to you?
- Are you utilising all available and licensed application modules?
- Do you know what other functionality could improve business processes?
- Would an upgrade to a later release give you any benefits?
- Can you safely upgrade or extend the existing procurement application modules?
- Do you have accurate and intelligent reporting of your procurement data?

The business benefits from an Oracle Procurement health check

The Prōject health check identifies whether you are getting the most out of your investment in Oracle Procurement applications. We will provide you with a clear, detailed analysis of the areas where you can improve the performance of your system and its support for your business processes. Most importantly, we will answer all the questions you have read above - you will be working with a Prōject consulting team of qualified accountants and Oracle-accredited implementation specialists who understand the business issues you face and the capacity of Oracle Procurement to deal effectively with them.

Calling on industry experience to create a bespoke diagnosis

Once our consulting team has built a complete understanding of your Oracle Procurement challenges, they will design a bespoke health check to focus on your areas of concern, including: Purchasing; iProcurement; Procurement Contracts; Payables; iSupplier; Sourcing, Inventory; Order Management; Business Intelligence and Procurement Analytic Applications.

Our team will also review the integration between your Oracle Procurement applications and other Oracle modules, your organisation model, accounting setup, flexfields and security, guided by your needs. Our review can be as broad and deep as you specify, extending to:

- New R12 applications and functionality, including sub ledger accounting
- Peripheral modules, integrated third party applications and customisations
- Additional procurement applications
- Specific applications and associated business processes
- Specific business processes and associated applications
- End business solutions, eg plan to order, procure to pay
- Integrated application family suite, including modules from Financial Management, Supply Chain Management, Projects, HR and BI Applications.

Collaborative health check approach

A Prōject health check allows you to remain in control of the scope of the process and outcomes. You will be working with a Prōject team of qualified accountants and Oracle Procurement specialists. The health check process is carried out in three phases:

Orientation	Discovery / analysis	Report
Prōject consultants work with your key stakeholders to understand and plan the scope of work and deliverables, identifying problems needing a special focus. During the health check we investigate with your teams to a depth determined by you.	We employ consulting experience and diagnostic tools to analyse your organisation's EBS implementation. Our discovery approach is informed by the orientation phase, especially the focus areas. Following information gathering, our consultants apply their expertise and experience to analyse and collate all findings.	Our comprehensive health check report typically includes a prioritise action plan, strategies, advice, upgrade indicative costs, timescales, roadmaps and recommended system configuration changes. You will then be fully briefed should you decide to call upon us to respond to the outcomes of the health check.

Costs and timescale

Cost: From £6,000
Timescale: From five days

The precise timescale and cost of a Prōject Procurement health check will vary depending on your specific requirements. The parameters of a health check are agreed in advance, including cost and delivery schedule.
